

Draining base

Perforated base : 40mm holes.
Excess water drains off underneath the container.

Allows good drainage of rainwater and after watering: the ideal solution for your exterior containers.

For exterior use only.
For interior use, combine with the saucer option (IOP-ASS).

€ 0

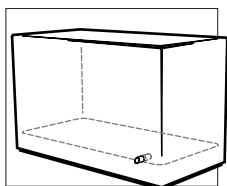

Water reservoir with overflow siphon

Watertight base allowing the creation of a reservoir in the drainage section. Overflow drainage via a siphon underneath the container. Requires IOP-ER option : Reinforced sealing.

For a reservoir free from the risk of frost, choose a draining base with the Horticultural System option (IOP-SH).

In areas subject to frost, this type of base cannot be used. Freezing of the reservoir may damage the container.

IOP-ER :
€ 20 - 40 Excl tax/
Container
acc. to size of container

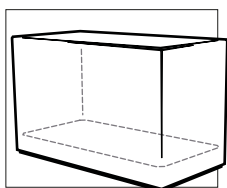

Drainage via weep hole

Watertight base with overflow drainage via a weep hole on one side of the container.

Ideal when water drainage is not possible underneath the container. Allows overflow drainage from a specific point. Possibility of reservoir with IOP-ER. Can be connected to a rainwater system.

In areas subject to frost, this base cannot be combined with a reservoir. Freezing may damage the container. Choose a draining base with option IOP-SH.
