IMAGE'IN

" Image'In " planters are made-to-measure in our workshops of Touraine, in France. Thus , they meet all requirements in the best conditions of quality and services.

Through their projects, our customers push us constantly to renewal and progress. Our plant containers are technical support to their creativity. Image'In fits well in the trend. Its sleek design highlights the plants in a contemporary style.

Ideal for indoors or outdoors uses, thanks to the use of fiber-cement, a durable and maintenance free material. That's why Image'In is a flowerbox resistant to the worst weather conditions (frost, rain, UV ...).

YOU CHOOSE

To present our expertise and help you build your project, we have created a virtual range. The formats shown here are an illustration of our manufacturing capacity without being a limit. We produce according to your choice of shapes, sizes, colors, finishes, options and accessories.

WE'RE HERE TO HELP YOU

Planters are accessories in an overall development project. Our philosophy is to adapt to meet the expected result without compromising and without altering your desire. We take care to maintain a direct relationship with the designer, thus we assure you the best support in the product definition.

IMPLEMENTATION

As standard, our flower boxes are placed on the ground, resting on the periphery. In options, you may prefer: Ground anchor fixing; Handling castors concealed; adjustable feet; distributed load anti-punching; etc.

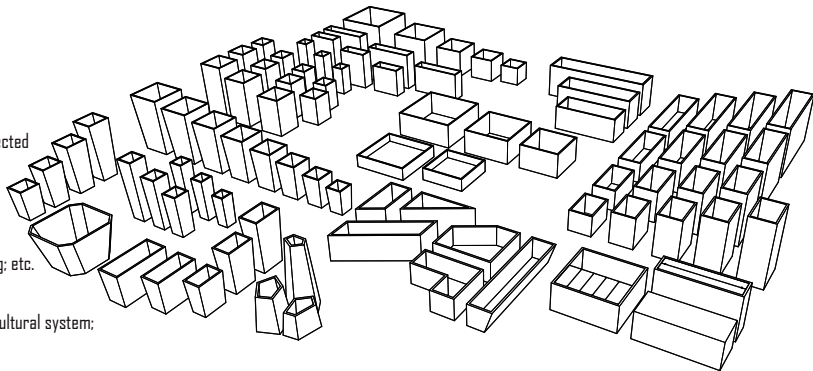

WATER MANAGEMENT

Bottoms are draining with evacuation under the container. Or in options : Water reserve with the horticultural system; Barbican; Watertight base (for indoor uses); Water level indicator; etc.

FINISHES

The use of liquid paint : Primer + Two-component polyurethane Paint + Varnish finishing - ensures excellent performance over time, even in outdoor use.

You can choose all colors of the RAL standard colour chart (excluding color chart in option) in matt, satin, gloss or micronized finishes.
