T - 33 (0)2 47 65 13 62

Manufactured by C.J.C.J. sarl
9, rue Allaire - Z.A. la Canterie
37800 Ste Maure de Touraine
FRANCE

Materials

Storage chest structure in sheet metal "SAS-CO"

Lacquered aluminum th. 3 mm or more depending on dimensioning.

Watertight closure lid in sheet metal "SOP-COUV"

Lacquered aluminum th. 3 mm or more depending on dimensioning.
Closure available with hinges (SOP-CHAR) or with cylinders (SOP-VERIN) in options.

Lid / Wooden seat "SOP-ASSB"

Assembly of raw exotic wood slats (wood species according to available stock - generally in IPE - Class 5 wood - FaS quality).
Closure without hinges : separate element to lay on.

Installation

Ground Installation on weight distribution buffer (anti-punching). In option : Installation on concealed casters (SOP-RL) or on adjustable support pedestals (SOP-PLOT).

Coulours and Finishes

Steelab provides two painted finishes :

Powder coated in mat, gloss or Micronised / textured finish; or

Liquid paint : Primer + Polyurethane two-component finish + Varnish in mat, satin, gloss or micronised / textured finish.

Each technique has its own relevance depending on the project and will allow the choice of color among the shades of the standard RAL color chart (except pearly, glittery and fluorescent). Other colors available in option.

Ventilation & Sealing

Storage box "SAS-CO" with perforated bottom for a good ventilation ;

Watertight closure with the aluminium lid "SAS-COUV" ;

Not-watertight closure with the wooden seat "SOP-ASSB".

STEELAB storage boxes are **produced in France and made to measure**, in the dimensions and colors requested.

Their aluminum construction offers great freedom of dimensions. Thanks to its flexibility and lightness, this material makes it possible to produce large-sized boxes without the handling or the ground flatness being problems.

The box structure and the closing lid are two items sold separately : Set made up of a "SAS-CO" storage box and its closing lid "SAS-COUV" or "SOP-ASSB".

The storage chest structure "SAS-CO"

The box structures are made of welded lacquered aluminum with finishing.

The closure lid "SAS-COUV"

The lacquered aluminium sheet metal lid offers a **light and watertight** closing solution for your garden chests.

The dimensioning can be adjusted for mixed uses storage chest and bench.

The Hinges "SOP-CHAR"

In option, the lid can be mounted on hinges, invisible when closed box and with a locking to maintain the cover in the open position.

The hinges facilitate the cover handling ; this option is particularly recommended on large storage chests.

The Lid / Wooden seat "SOP-ASSB"

The wooden slats lid is not watertight and heavier than an aluminum cover.

More suited to the bench function, it offers seating comfort with a warm design.

The choice of raw exotic wood provides a great stability and very good longevity.

Simple removable closure, without hinges, permitting access to a storage space for objects resistant to moisture.
