

STEELAB
a brand
ATELIER SO GREEN

Materials

"SAS-COCC" and "SAS-CO" sheet metal chests

Lacquered aluminum 3mm thick or more depending on dimensioning.

"SOP-ASSB" Wooden seat closure

Assembly of raw exotic wood slats (wood species according to available stock - generally in IPE - Class 5 wood - FaS quality). The wood is left untreated ; its colour will gradually evolve and naturally tend towards a "silver-grey" hue.
Closure without hinges : separate element to lay on.

Installation

Ground installation on weight distribution buffer (anti-punching). Optional : Installation on concealed casters (SOP-RL) or on adjustable support pedestals (SOP-PLOT).

Colours and Finishes

Steelab provides two painted finishes :

Liquid paint : Primer + Polyurethane two-component finish + Varnish in matt, satin, gloss or micronised / textured finish ; or

Powder coated in matt, gloss or Micronised / textured finish.

Each technique has its own relevance depending on the project and will allow the choice of colour among the shades of the standard RAL colour chart (except pearly, glittery and fluorescent). Other colours available as options.

Ventilation & Sealing

"SAS-COCC" Chest with perforated bottom for good ventilation and lid with watertight closure for storing sensitive objects;

"SAS-CO" + "SOP-ASSB" Chest with perforated bottom for draining water and good ventilation and closure - non-watertight wooden seat for storing insensitive objects.

STEELAB storage boxes are **produced in France and made to measure**, in the dimensions and colors requested.

Their aluminum construction offers great freedom of dimensions. Thanks to its flexibility and lightness, this material makes it possible to produce large-sized boxes without the handling or the ground flatness being problems.

"SAS-COCC" Hinged lid chest

The box structures and lids are made of welded lacquered aluminum with finishing.

The lacquered aluminium sheet metal lid offers a **light and watertight** closing solution for your garden chests. It is mounted on hinges, invisible when the chest is closed. The lid is held in the open position by a locking tab.

The dimensioning can be adjusted for mixed uses storage chest and bench.

The "SOP-VERIN" option

As an option, the lid can be fitted with cylinders to make it easier to handle.

This option is particularly recommended for larger chests with heavier lids, to make handling easier and distribute the lifting thrust more evenly.

The "SOP-CLE" option

As an option, a key or code locking system can be added.

"SAS-CO" Chest with "SOP-ASSB" Wooden seat

The wooden slats lid is not watertight and heavier than an aluminum cover. More suited to the bench function, it offers seating comfort with a warm design.

The choice of raw exotic wood provides a great stability and very good longevity.

Simple removable closure, without hinges, permitting access to a storage space for objects resistant to moisture.
